

## Cartesian axes robot

We manufacture cartesian axes robots for whatever application and environment. Depending on the precision, speed and load, choose the components that best fit your application reducing these costs and offering a warranty, saving money and reduced maintenance repairs. Perform programming jobs even for multiple formats of positioning with one arm. Costs of after-sales service are guaranteed at minimal cost and little time spent.

## Robot arm

Robot arm assembly for high precision work, little space or high speeds. Programming multiple jobs with one arm to increase production even via modem. Strong arms designed to work in aggressive environments with hidden internal joints for less deterioration.
